

Standard seal material for brass couplings in the »GEKA plus« series: NBR (-10 °C to +90 °C).

Standard seal material for stainless steel couplings in the »GEKA plus« series: FPM (-10 °C to +150 °C).

Seal Art. No. D 300 has KTW approval for category D2 with long-term test results as per DVGW W270; it is additionally approved for food contact and suitable for drinking water (-10 °C to +90 °C).

Replacement seals		
Art. No.	Ident No.	Designation
D 116	107835	NBR seal, suitable for old series
D 117	107836	NBR seal, suitable for couplings in the »GEKA-plus« series (not for couplings with screw-ring)
D 118	107837	NBR seal, suitable for couplings in the »GEKA plus« series with screw-ring
D 119	107838	FPM seal, suitable for all stainless steel couplings in the »GEKA-plus« series
D 300	107839	NBR seal, suitable for couplings in the »GEKA-plus« series (not for couplings with screw-ring), with KTW approval
